PRODUCT SPECIFICATION

PRODUCT DETAILS

Part Number	Multiple
SAP Code	Multiple
Product Name	LUBRITOSE MANNITOL
Product Description	LubriTose™ Mannitol is a co-processed excipient consisting of USP compliant Spray Dried Mannitol and NF/JP compliant Glyceryl Monostearate. The co-processed formula is 96% Spray Dried Mannitol as the compressible ingredient and 4% Glyceryl Monostearate as a lubricant. The co-processing process results in a uniform physical dispersion of the glyceryl monostearate and the chemical attributes of both ingredients remain in tact.

INGREDIENT DECLARATION

Ingredient	CAS number
Spray Dried Mannitol (USP)	69-65-8
Glyceryl Monostearate (NF, JP)	123-94-4

USAGE DETAILS

LubriTose™ Mannitol is meant to be used in standard direct tableting applications or roller compaction. It is only necessary to add the API (active pharmaceutical ingredient), any other desired ingredient, and proceed to tableting. The Glyceryl Monostearate is co-processed in to act as a lubricant and therefore it is not necessary to add a lubricant such as Magnesium Stearate to the tableting formulation. By using LubriTose™, you get a true direct tableting operation as the lubricant addition step is removed. LubriTose™ is ideal for continuous systems and also for QbD.
